

Speech and Language Therapist

Our lovely speech and language therapists can support individuals with communication differences or difficulties and developing language skills. They work directly with individuals and their families and carers to provide them with tailored support to maximise someone's communication strengths.

They can also help with eating and swallowing needs, for example needs around restrictive diets related to managing the textures of foods in the mouth.

We understand meals are often centred around social interactions with others. This can be difficult for some individuals to manage and navigate- our speech and language therapist are able to work with you in understanding these interactions and building social scripts and alternative communication methods.

The team are skilled in providing assessment and then advice and guidance to third partners such as schools as needed to ensure individuals reach their full potential.
